

Meridian Platform Operations Guide

Document version 4.2 · reviewed 2026-06-28 · platform team

This guide covers operational limits, delivery guarantees and failure handling for the Meridian API. It supersedes the operations appendix of the integration handbook.

1. Support response targets

Response targets are measured from ticket creation to first human response, during the support hours applicable to the plan.

Plan	First response	Support hours	Named contact
Developer	No target	Community forum only	No
Starter	1 business day	09:00-17:00 local	No
Growth	4 business hours	09:00-21:00 local	No
Enterprise (standard)	1 hour for urgent	24x5	Yes
Enterprise (premier)	15 minutes for urgent	24x7	Yes, plus on-call

2. Uptime commitments and service credits

Service credits are issued against the monthly invoice for the affected month. Credits must be requested within 30 days of the incident and are the sole remedy for downtime.

Monthly uptime	Service credit	Applies to
99.95% or above	None	All paid plans
99.00% to 99.94%	10% of monthly fee	Growth and Enterprise
95.00% to 98.99%	25% of monthly fee	Growth and Enterprise
Below 95.00%	50% of monthly fee	Growth and Enterprise

The uptime commitment is 99.95% for Growth and 99.99% for Enterprise. Scheduled maintenance announced at least 72 hours in advance is excluded from the calculation.

3. Request lifecycle

The diagram below shows the path a request takes and the points at which it can be rejected before reaching the core API.

Meridian request lifecycle

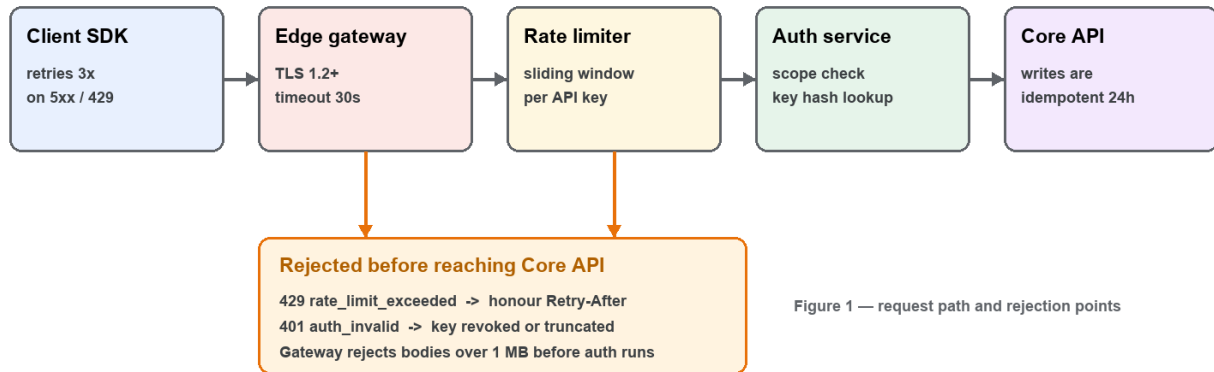

Figure 1 — request path and rejection points

4. Incident severity definitions

Severity	Definition	Target mitigation
Sev-1	Complete outage or data loss affecting many customers	60 minutes
Sev-2	Major feature unavailable, no workaround	4 hours
Sev-3	Degraded performance, workaround exists	2 business days
Sev-4	Cosmetic or documentation defect	Next release

5. Error code reference

The table below spans a page boundary. Each row is independent; the header repeats on continuation pages.

Code	HTTP	Retryable	Operator action
rate_limit_exceeded	429	Yes, after Retry-After	None; client must back off
endpoint_limit_exceeded	429	Yes, next hour	Raise sub-limit if justified
temporary_block	429	After 15 minutes	Check for tight retry loop
auth_invalid	401	No	Confirm key not revoked or truncated
auth_env_mismatch	401	No	Test key used against production
scope_insufficient	403	No	Issue key with required scope
ip_not_allowed	403	No	Add source IP to allowlist
quota_exhausted	403	Next billing cycle	Upgrade plan
payment_required	402	After payment	Route to billing team
resource_not_found	404	No	Check environment and account
conflict_version	409	Yes, after re-read	None; optimistic concurrency
idempotency_key_reused	409	No	Client bug; key reused with new body
payload_too_large	413	No	Advise batch endpoint
unprocessable_entity	422	No	Semantically impossible request
internal_error	500	Yes, with backoff	Check incident channel
service_unavailable	503	Yes, honour Retry-After	Deploy or capacity event
upstream_timeout	504	Yes, idempotent only	Check dependency dashboards
malformed_json	400	No	Client serialisation bug
missing_content_type	400	No	Advise application/json
cursor_expired	400	No, restart iteration	Cursor older than 24 hours
method_not_allowed	405	No	Wrong verb for endpoint
unsupported_media_type	415	No	Non-JSON content type
validation_failed	400	No	Read the field property
sso_signature_invalid	401	No	IdP certificate rotated
sso_audience_mismatch	401	No	Entity ID mismatch in IdP
sso_assertion_expired	401	Retry login	Clock skew above 3 minutes
sso_user_not_provisioned	403	No	Enable JIT or invite user
webhook_signature_mismatch	n/a	No	Raw body re-serialised by client
export_limit_exceeded	429	Next hour	10 export creations per hour
region_mismatch	403	No	Account pinned to another region
tls_version_unsupported	n/a	No	TLS 1.0/1.1 disabled 2025-09-01
auth_missing	401	No	No Authorization header sent

Code	HTTP	Retryable	Operator action
auth_scheme_unsupported	401	No	Query-string auth removed 2025-11-01
scim_token_invalid	401	No	Regenerate SCIM bearer token
scim_user_conflict	409	No	Duplicate externalId in IdP
export_range_too_wide	422	No	Maximum 24 months per export
export_row_limit	422	No	Maximum 50 million rows
export_url_expired	410	Re-request URL	Download URL valid 24 hours
webhook_endpoint_disabled	n/a	No	20 consecutive non-2xx deliveries
webhook_undeliverable	n/a	Replay only	8 attempts exhausted over 40 hours
batch_size_exceeded	422	No	Maximum 500 records per batch call
concurrent_export_limit	429	When one finishes	Plan concurrency ceiling reached
connection_ceiling	n/a	Yes	Connection reset, not an HTTP error
version_unsupported	400	No	Pinned version past 24-month window
field_immutable	422	No	Field cannot change after creation
account_suspended	403	No	Chargeback or compliance hold
